Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This action is response to communications: application, filed 08/16/2001; amendment filed 02/16/2006. Claims 1-28 are pending; claims 1, 3-7, 9, 15, 18, 22 are amended; claims 23-28 are added

2. The applicant's arguments file on 02/16/2006 have fully considered but they are moot in view with new ground for rejection

Claim rejections-35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27-28 are rejected under 35 U.S.C 103(a) as being un-patentable over Alcorn et al. (U.S. 6,988,138) in view of Newville et al. (U.S. 6,349,797)

Regarding to claims 27-28:

Alcorn discloses the invention substantially as claimed, including a system, which can be implemented in a computer hardware or software code for updating user updateable Web sites of user updateable Web pages, said system comprising:

A communications network for a user to communicate with the host: (Alcorn discloses “Web server host” which is equivalent to “the host”: figure 1, item 130)

Data storage within the host system having a Web site comprising a set of user Web pages: (Alcorn discloses the main page of web server host contains plurality of other pages (links): column 4, lines 55-67)

However, Alcorn does not explicitly disclose updateable Web page having a respective associated companion page that comprises a copy of the data of the associated updatable Web page, and an update module within the data storage of the host system, said update module providing the user with the associated companion page so the user can make updates to the companion page without using either a mark up language or a template, wherein the updates that are approved by the user are also made to the associated updateable Web page.

In analogous art, Newville discloses BOM system includes BOM servers and BOMGUI which provides an environment for creating, modifying and message, and sending the modified message to display units without using template, see (Newville: column 14, lines 22-67; column 15, lines 14-18)

Thus, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to combine Newville’s ideas of creating and modifying a message without using template structure with Alcorn’s system in order to provide an efficiency web site for online users

Claims 1, 15, 19 and 22: are allowed

Reasons for allowance

With respect to claims 1, 15, 19 and 22. The prior arts of record, singly or in combination fails to teach the features of claim(s) limitations thereof. Specially, inter alia, it fails to teach a method, a system and computer software for automatic update website, which is capable of perform from a remote facility in combination with the use of preparation updatable Web pages to update Websites; in addition to use a companion page associated with the updatable webpage, the companion page comprises a copy of variable data from the updatable webpage; an authorized user directly typing a text and/or by adding/removing graphic to the companion page without typing on a template and/or using website markup language; wherein an instance of an updatable webpage is created, selected and maintained, and the updatable webpage is transmitted to at least said remote communication facility.

Claims 2-14, 16-18, 20-21, 23-26 further limit the allowed claims, therefore they are also allowed

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2152

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
